↙
The following amendment and remarks are respectfully submitted to correct a
typographical error.

IN THE CLAIMS

- 1 2. (Amended) The method as set forth in claim 1, wherein reclaiming said native code
- 2 associated with said first method and compiling byte code into native code associated with said
- 3 second method in response to said determination comprises reclaiming said native code
- 4 associated with said first method in response to a determination that said native code space
- 5 exceeds said threshold.
